Department of Computing Sciences Fellows Research

The Computing Sciences Department has a major in Computer Information Systems and a major in Computer Science. Both majors require at least one 4 semester hour elective. The Elon College Fellows can apply their CSC 499 research to fill an elective requirement in Computer Science or their CIS 499 research to fill an elective credit in Computer Information Systems.

The major in Computer Information Systems does not require a senior capstone. The major in Computer Science has a software development / capstone that is not research based and is required of all Computer Science majors.
